Help each other

Action

Raise awareness

support

Student Clubs

What is it ?

- Maraude
- Blood collection
- Fundraising for associations:
festive days, sales, sports challenges
- Sensibilise

When ?

Once per month

Always in an idea of respect of the environments

Contact us : angele.gourdelier@cri-paris.org ; rim.sadry@cri-paris.org ;
katell.menard@cri-paris.org or marie.charles-bray@cri-paris.org

BrasseLPI

How are we planning our year ?

- Preparing a mash is approximately 4h long
- A complete beer making is of approximately 6 weeks
- Our club will also collaborate with other clubs for events or experimentation

October 2021	Inventory of the equipment, first meeting
At least once a month	Brewing activity
At least once a month	Formation, experimentation, collaboration

mathilde.louis@cri-paris.org / plaifon.parama@cri-paris.org

RAGE AGAINST THE CUISINE

Train both our facilitation and cooking skills while learning about dietary habits, new cultures related to international cuisine, and of course, food sustainability.

PROMOTING GENDER EQUALITY

Educational guide

A Wisdom Journey

Philosophical board game

Adapted to the gender equality theme + digital version

Create workshops about gender equality

Student Clubs

Upcycling Club

Upcycling club

What will we do:

- ❖ Meet and learn new upcycling techniques together (15 workshops during the year)
- ❖ Examples of future workshops:
 - Sew and no sew grocery bags
 - Authentic Kyrgyz purses
 - DIY cameras
 - Upcycling art
 - Upcycled Christmas decorations
- ❖ Prove that waste can be useful and beautiful
- ❖ Take over the sharing closet

IMHOTEP

Why ?

- Health communication is boring
- Negative and full of fake news

Goal ?

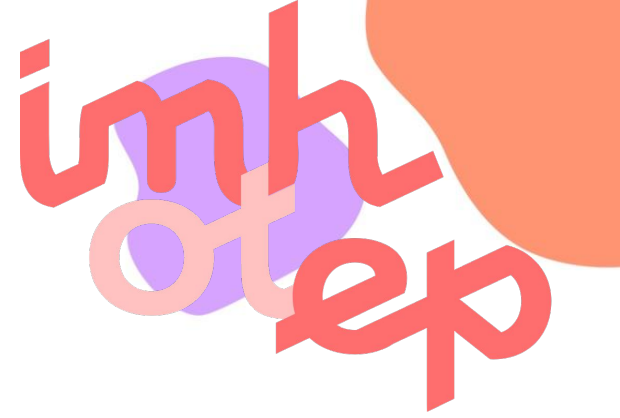

- Develop a culture of health promotion

What ?

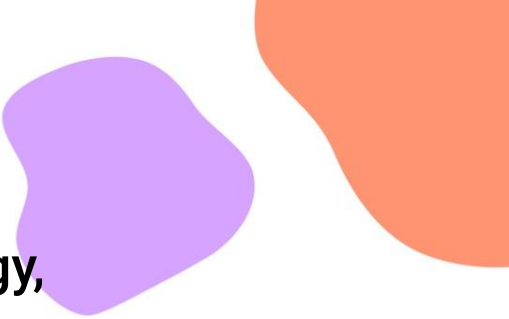

- Media for positive and empowering health topics

How ?

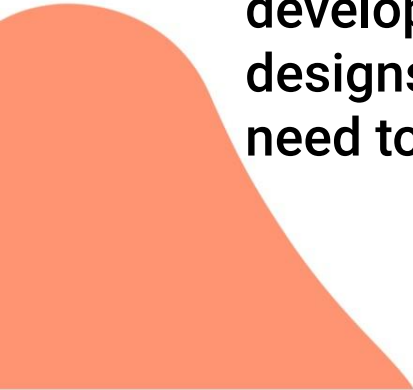

- Interdisciplinary teams for changing our way to share health promotion messages to young people 🚀

SynBio

The SynBio club will be a place where we explore the cutting edge of molecular and systems biology, and try to draft hypothetical projects to improve upon them.

We will go through all stages of project development from the initial idea to experimental designs. Dry lab and programming projects don't need to be hypothetical!

Some interesting projects we have in works right now:

- **Severe COVID-19 detection through smartwatch sensors**
- **Universal protein docking stations**
- **Augmented reality protein collection game**
- **Bioinformatic workflow compiler**
- **Biweekly tipsy science Q&As with researchers at a bar**

These are just some suggestions, the possibilities are endless.

Multicultural Club

*Feel the connection.
Go out of the bubble*

Benefit from the
UNIQUE and
DIVERSE
environment of **CRI**!

Introduce your
CULTURE to the
community!

INTERACT with
other students
through cultural
activities.

Don't feel homesick!
Find like-minded people
who share the same
DREAMS and **HOPES**.

Find someone
trying to **LEARN**
FRENCH like
you!

Let our differences and similarities unify us!
Multicultural Club promotes interaction, friendships, diversity, and unification of
the CRI community.

Join our community now!
